

NOVAS

Smart Lock™

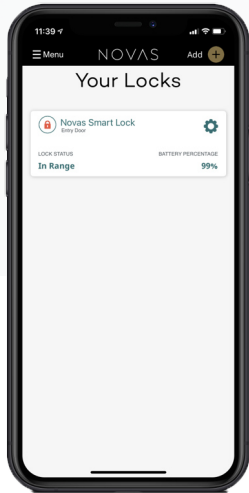

INTRODUCING SMART LOCK™

the latest innovation from Novas

Smart Lock™ by Novas is leading industry design, installed directly into the doorframe, removing the need for bulky digital systems fixed to the door.

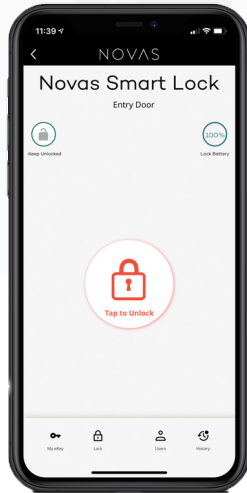

How It Works

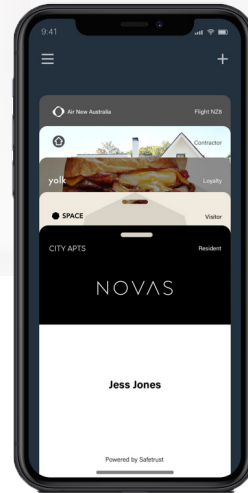

Digital Control

Control access to your front door via the Novas Smart Lock™ app.

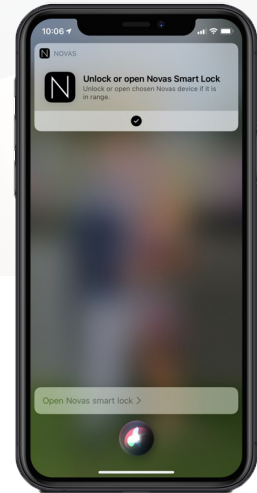

One Touch Unlocking

Create a shortcut for secure, fast and easy access.

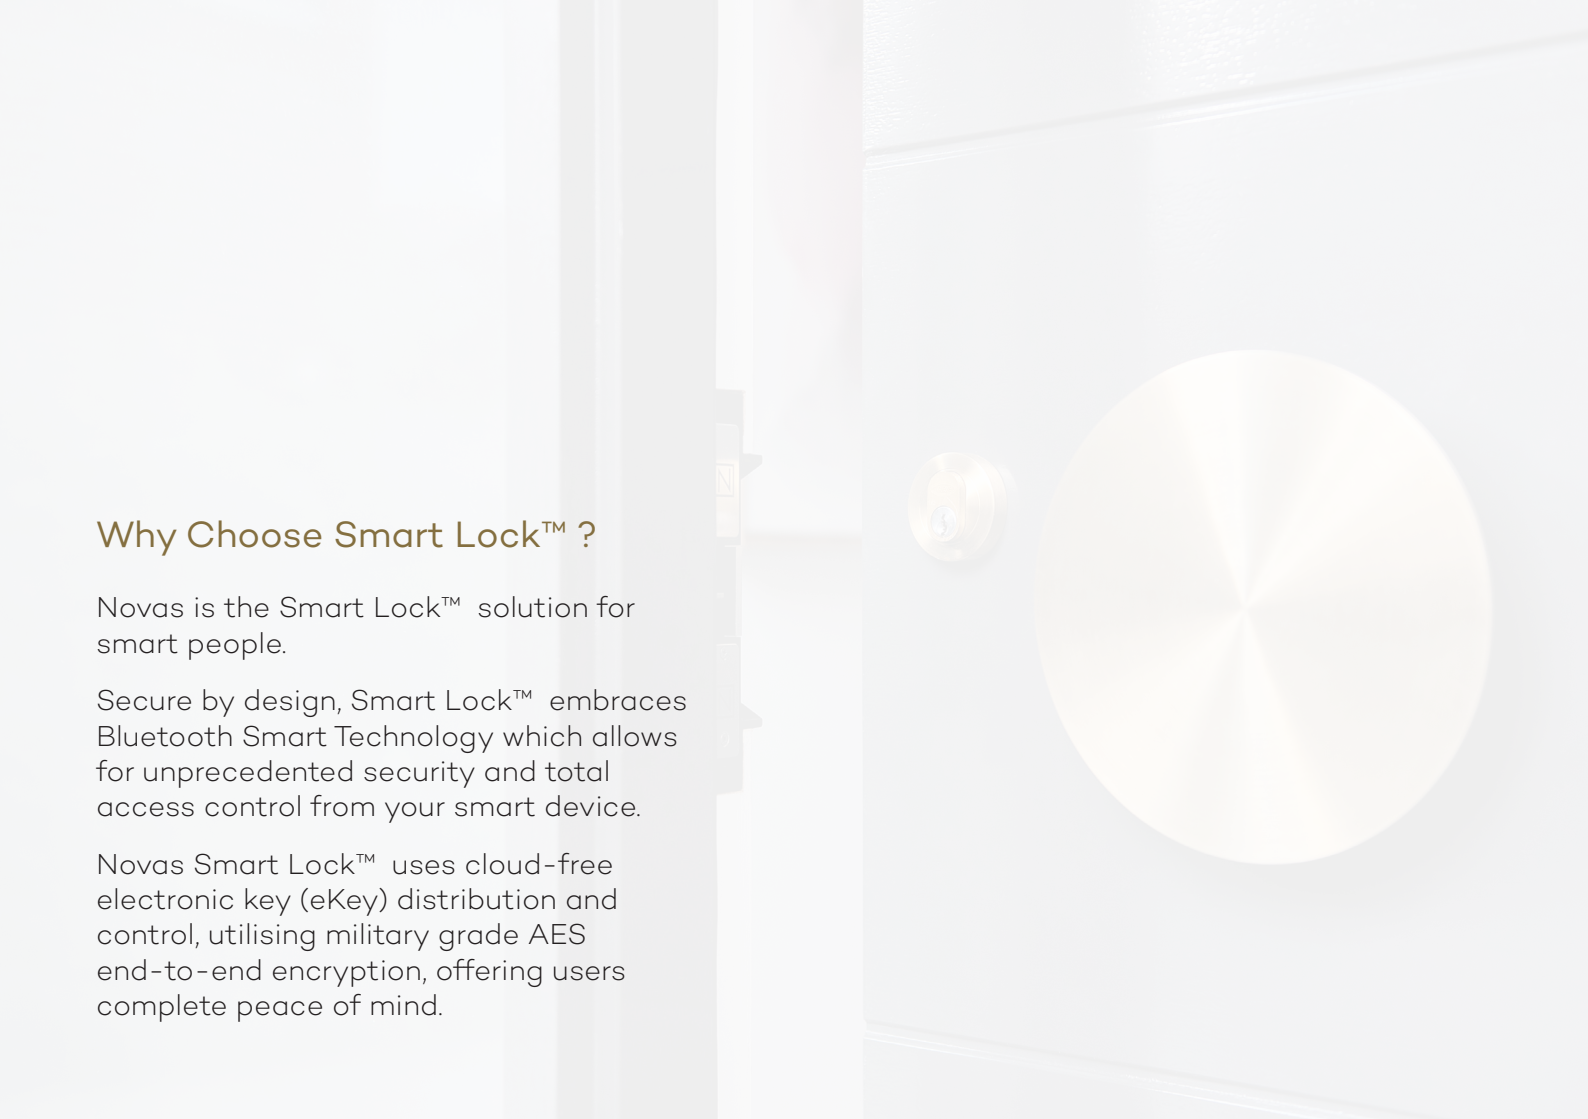

Integrated Access

Forget the fob. Our digital wallet provides you access to across your entire building.

Go Handsfree

Hands full? Lock and unlock handsfree.

Why Choose Smart Lock™ ?

Novas is the Smart Lock™ solution for smart people.

Secure by design, Smart Lock™ embraces Bluetooth Smart Technology which allows for unprecedented security and total access control from your smart device.

Novas Smart Lock™ uses cloud-free electronic key (eKey) distribution and control, utilising military grade AES end-to-end encryption, offering users complete peace of mind.

LEADING DESIGN

This in-built technology is invisible to the eye, making eyesore digital security systems a thing of the past.

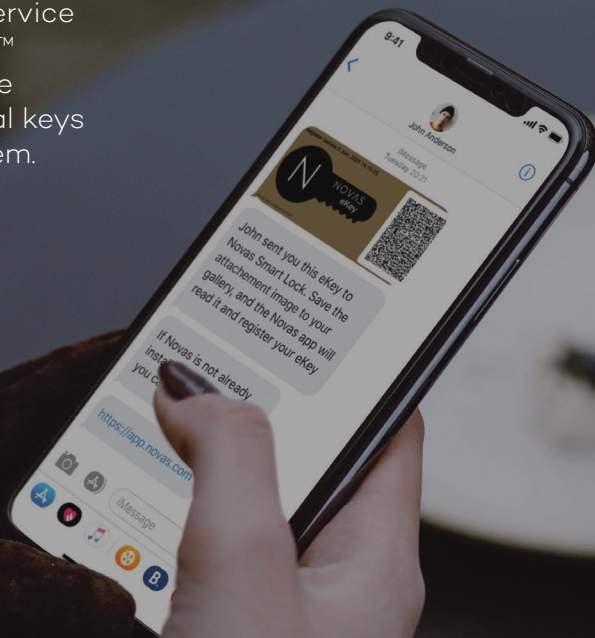

BUILDING INTEGRATION

The Novas app digital wallet can provide seamless access throughout entire buildings, all from your device – taking building integration to a whole new level.

KEY SHARING

Share unlimited access, one time access or specific times for family, friends, guests or service people. Novas Smart Lock™ provides you with complete control over who has digital keys and when they can use them.

Features

Novas Smart Lock™ provides all the mechanical benefits, features, security, durability and functionality of a traditional commercial grade mortice lock combined with the flexibility of RFID, Biometric, Pin Code, and Bluetooth technologies. Key features include:

- Bluetooth technology
